جديد في خدمات الالياز

من نحن who are we

Rafee Metal Industries is a mechanical and structural engineering services company for critical high reliability applications.

Rafee Metal Industries, founded in 1989. Our operations in Dammam, Saudi Arabia. We are utilizes the art and engineering for our extensive knowledge of industrial needs, and vast engineering experience to deliver sound, responsible stress and fatigue engineering analysis.

Critical applications call for quick and decisive solutions, backed with expertise and experience. Company engineers have been providing their clients with high level analysis for years.

Rafee Metal Industries company offering planning, analysis and designs services to both public and private entities. Since 1989 Rafee Metal Industries, services has been delivering functional, high quality projects at the lowest possible cost.

From the very beginning, our success has been based on the individual attention we provide to each of our clients. We address and anticipate the needs and concerns of our clients to satisfy both their immediate and future goals. This dedication is evident in the number of clients we have retained and subsequently the in-depth, divers experience we have acquired through repeat business.

Rafee Metal Industries have extensive experience, which ranges from the design of deferent machine parts form metal sheets like Mild Steel, Stainless Steel, Aluminum etc. and we are making welded parts, Roll forming products, rolling of metal tubes, rolling of metal pipes, rolling of metal sheets in deferent thickness, and much more. We have repeatedly proven the depth of our experience and the quality of our workmanship by successfully completing projects within the given time and budget constraints.

Today, Rafee Metal Industries continue to grow steadily but conservatively, allowing us to remain committed to the needs of our current clients, while extending our engineering services and consulting services to new clients.

Rafee Metal Industries is specialist engineering services & solutions company servicing clients across a range of engineering segments helping improve their engineering efficiency, support their global footprint and improve their competitiveness. Our robust work planning methods to ensure an effective global delivery model for engineering services projects.

Rafee Metal Industries has the ability to Design, Manage, finance and implement your project in an efficient, cost effective way.

Our engineering team are able to do Plasma- cutting, Oxy- cutting, Water Jet- cutting, Roll Forming, Embossing Metal Sheets, Cutting & Bending Metal Sheets, Rolling Metal Sheets, Rolling Metal Pipes, Rolling Metal Tubes, & making deferent welded parts for using deferent industrial and commercial uses. And we have a well experienced product development team & environment and act as a virtual extension of their engineering enterprise.

Laser Cutting Service in Mild Steel, Stainless Steel, Aluminum, Copper and Brass :

We offer high precision laser cutting services with Latest Next Generation Technology C.N.C. laser cutting machines. These high quality laser cutting services we offer to our clients can be availed at most economical rate. Further we are well facilitated with experts dealing in laser cutting process who have sound understanding of laser technology which is mostly used for cutting industrial materials like COPPER, BRASS, ALUMINIUM, STAINLESS STEEL, MILD STEEL. Our laser cutting services are extensively used to cut and fabricate different kinds of industrial parts using sheet metal of various thickness and sizes.

Advantages : The advantages of our laser cutting services include.

PROTOTYPE SMALL VOLUME OR BIG VOLUME QUANTITIES.

Since no jig or fixtures are used, there is no tooling cost

The designs can be changed easily at very low cost

Consistent accuracy as well as lack of operator error causes very less scrap

This technology gives high finish, excellent Precise Cutting quality, accuracy as well as repeatability

Complex shapes can also be formed easily

Different kinds of materials can be CUT.

Reduction in material waste: material saving by using nesting software

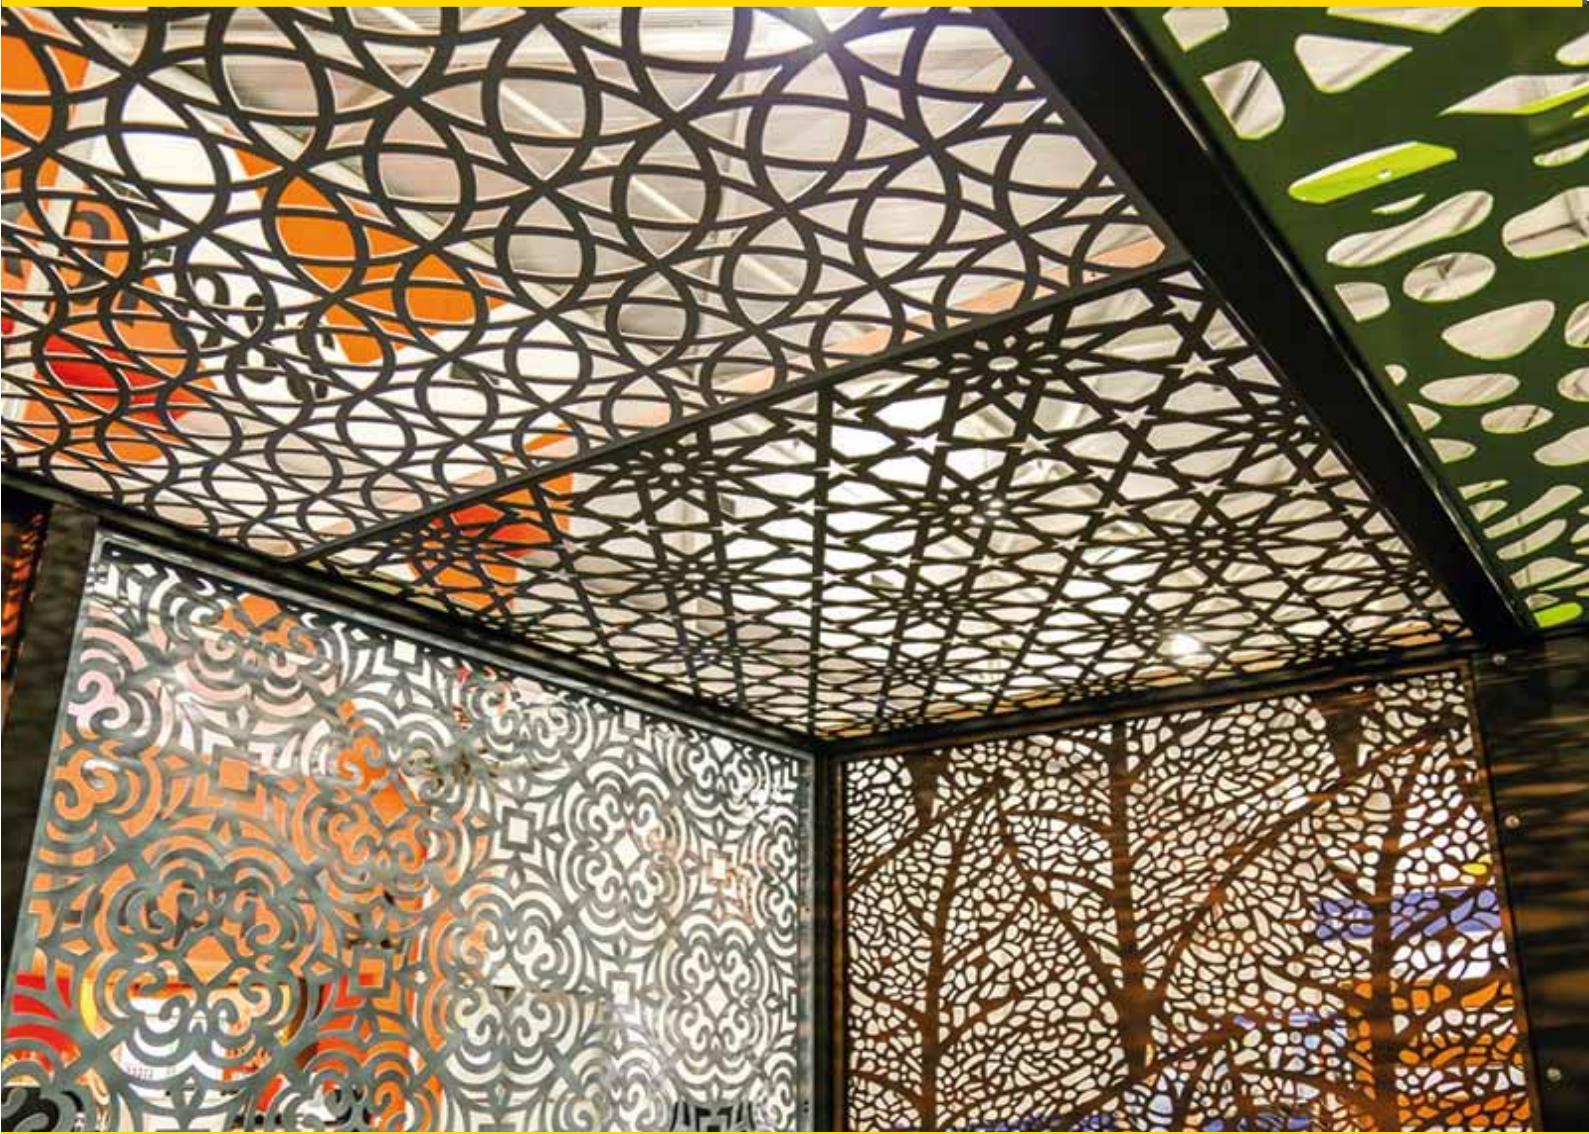

Does not require any kind of post processing on jobs Our laser cutting services are widely used in Industrial fabrication engineering, Architectural, Pharmaceutical Machineries, Textile Machineries, Railways, Shipping Yard Fabrication other related job works. Precision Sheet Metal Components in Mild Steel and Stainless Steel Material. Precision Sheet Metal stamping Components.

We offer a wide range of precision sheet metal components as per the desired requirements and specifications. These sheet metal components cater to diverse industrial requirements such as air conditioning industry. We also specialize in offering bulk orders requirements of clients. Each of the precision sheet metal components manufactured by us possess a high degree of durability, performance and price competitiveness.
